PROMANADE

PROJECT SCOPE & PURPOSE:

To install enclosed seating for the Range Food Court in the form of "wine barrels".

These are to be temporary structures on a six month lease to the SSRC.

The barrels are to include low heat (500w) and light and are accessed through a glass door on the end of the barrel.

The barrels sit on a deck supplied by the manufacturer for stability.

The manufacturer's description and instructions call these out as "saunas". They will not be used that way. These are for restaurant seating associated with the "Range Food Court".

Proposed Barrels
