RE: STEAMBOAT SPRINGS CITY HALL STRUCTURAL CONFORMANCE

To Whom It May Concern,

Raker Rhodes Engineering (RRE) has reviewed shop drawings and submittals for structural materials and fabrications prepared by others. Additionally, calculations for structural design performed by third parties have been reviewed. These reviewed items have been found to be in general conformance with the design provided by Raker Rhodes Engineering.

RRE also performed field observations during various stages of construction. It was observed that construction was proceeding in general conformance with the design provided by RRE. Any observed non-conformance has been communicated to the contractor with any necessary remedial action.

Sincerely,

Nick Decker, PE
Raker Rhodes Engineering, LLC
