## **Comments:**

## **Corrections:**

- 1 Shoulder and backfill material on the east access road is required to be compacted, backfill - seeded and blanketed.
- 2 Treatment facility on west access road does not appear to be constructed correctly and allow for intended operation of facility.
- 3 Ditch directly adjacent to west access road is holding water. Appears that additional infrastructure/grading modifications are necessary to convey surface drainage to treatment facility.
- 4 Critical improvements are not constructed per approved phasing plan.

Sincerely,
