**Re: Letter of Acceptance for Building Permit Closeout – Steamboat Ski and Resort
Alpine Coaster No. B-16-198**

Dear Mr. Miles,

Today Dave Tegtmeyer and I inspected the Alpine Coaster project for compliance with City stormwater regulations. It was determined that all ground disturbance activities have been completed and the required revegetation of 70% of pre-disturbance levels has been established. The City accepts the project as completed and determines that permit B-16-198 can be closed at this time.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Slamal".
