Subject: The Steamboat Grand

Jeff.

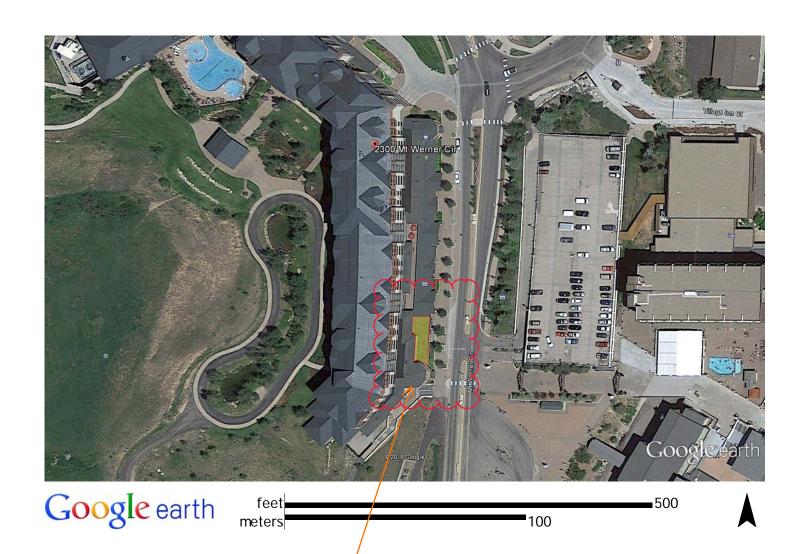

As we have previously discussed, you are hereby authorized to proceed this Fall with the roof repairs and snow retention system upgrades as proposed and discussed.

Let me know if you have any questions.

Paul Barry

SHINGLES

RCRBD **RECORD SET**

ENERGY STAR® IS FOR ROOFS TOO

Similar to the energy-efficient appliances in your home, roofing products can provide energysaving qualities. Owens Corning* ENERGY STAR* qualified shingles can help reduce your energy bills when installed properly. These shingles reflect solar energy, decreasing the amount of heat transferred to a home's interior — and the amount of air conditioning needed to keep it comfortable. Actual savings will vary based on geographic location and individual building characteristics. Call 1-800-GET-PINK® or 1-888-STAR-YES for more information.

HOME SWEET HOME

Your home is your sanctuary, it's the place where you want to feel the most comfortable. Safe, Protected, But no matter how much you Jove your house, it seems the work is never completely done. And if purchasing a new roof is on your to-do list, it may seem like a daunting task — especially if your roof is already damaged or leaking. Since a roof plays such an important role in protecting you and your family from the elements, you realize that you can't let the damage get out of hand.

Don't worry, we know that a roof replacement project is a big, important decision, You can feel confident about choosing our roofing products — Owens Corning has been a recognized leader in the building industry for over 75 years, In fact, we're America's #1 roofing brand** Not only can we help you choose the right shingle and roofing system components, we can also help you select the right contractor for the job — an Owens Corning Roofing Preferred Contractor Together we can make this a positive experience - an opportunity, really. This is your chance to choose a roof that not only has outstanding performance, but also has exceptional beauty. So for years to come, you'll feel great every time you pull in the driveway.

Protected, Proud, Home,

The Total Protection Roofing System™^ Working together to help protect and enhance your home.

It takes more than just shingles to protect your home. It takes an integrated system of components and layers designed to withstand the outside while controlling temperature and humidity inside

The Owens Corning* Total Protection Roofing System** A gives you the assurance that all of your Owens Corning* roofing compor are working together to help increase the performance of your roof— and to enhance the comfort and enjoyment of those who live

TruDefinition® Duration® Shingles are a component of the Owens Corning® Total Protection Roofing System,™A

SHINGLE COLOR SELECTION

RCRBD **RECORD SET**

Bold contrast. Deep dimension. TruDefinition.

TruDefinition® Duration® Shingles are specially formulated to provide great contrast and dimension to any roof. Through the use of multiple granule colors and

shadowing, TruDefinition Duration Shingles offer a truly unique and dramatic effect. This exclusive combination of color and depth is what makes TruDefinition Duration Shingles like no other.

in popular colors with bold, lively contrast and complementing shadow lines for greater dimension. They feature a Limited Lifetime Warranty (for as long as you own your home), 130-MPH Wind Resistance Limited Warranty* and an Algae Resistance Limited Warranty* Beyond the outstanding curb appeal and impressive warranty coverage, they also come with the advanced performance of patented SureNail* Technology.

The SureNat* Difference— A technological breakthrough in roofing. The innovative features of Owens Corning* TruDefinition* Duration* Shingles with patented SureNat*

Technology offer the following: Breakthrough Design, Featuring a tough,

woven engineered reinforcing fabric to deliver consistent fastening during installation.

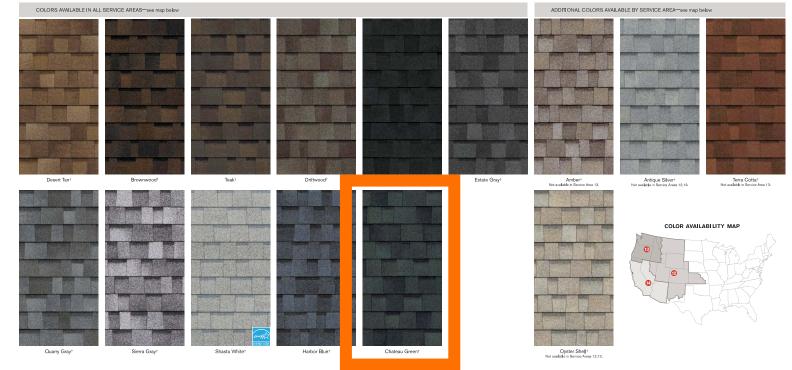

of reinforcement occurs when the fabric overlays the common bond of the shingle laminate layers that offers excellent fastener holding power.

Superior Adhesion, Our enhanced Tru-Bond® sealant grips tightly to the engineered fabric nailing strip on the shingle below.

Excellent Adhesive Power. Specially formulated, wide adhesive bands help keep shingle layers laminated together.

Exceptional Wind Resistance. Engineered to deliver 130-MPH* wind warranty performance with only 4 nails. Fewer nals required can mean fewer deck penetrations

NOTES

- All of Sheffield's CoolR metal is painted with a .20 mil primer and .70 -.90 mil Top Coat of 70% Kynar 500 or Hylar 5000. The reverse side has a .20 primer and .30 - .40 backer coating.
- 22 gauge steel available in 44.375" and 48.375" widths upon request. 0.50 aluminum available in 48.000" width upon request.
- For low slope roofing to meet Energy Star requirements the ISR must be ≥0.65. After 3 years, the solar reflectance must be ≥ 0.50 .
- For steep slope roofing to meet Energy Star requirements the ISR must be ≥0.25. After 3 years, the solar reflectance must be ≥0.15.
- For low slope roofing to meet LEED 2009 requirements the SRI must be ≥78.
- For steep slope roofing to meet LEED 2009 requirements the SRI for 100% of the roof must be ≥ 29.
- Low slope is defined as ≤2:12.
- Steep slope is defined as >2:12.

SRI	Solar Reflectance Index

Oil canning is an aesthetic issue and is an inherent part of light gauge cold formed metal products. By using coil that has been processed properly, designing for thermal movement, following stringent specifications for installation and proper handling most oil canning can be eliminated. Oil canning is not grounds for coil/panel rejection.

WeatherLock® Flex

Flexible Self-Sealing Ice & Water Barrier

R C R B D RECORD SET

WeatherLock* Flex Flexible Self-Sealing Ice & Water Barrier The high-performance solution for specialty applications.

WeatherLock* Flex Flexible Self-Sealing Ice & Water Barrier provides excellent protection against water infiltration resulting from freeze/thaw cycling, wind-driven rains and normal water flow around eaves, rakes, valleys, vents, chimneys and skylights.

- High performance—flexible and pliable poly surface and modified asphalt combine to adhere around irregular shapes, inside corners and sharp angles, even in cold-weather applications to 40°F
- Added Protection—acts as a waterproof barrier in the most vulnerable sections of the roof, like valleys and other roof penetrations, to create a second line of defense. For optimal protection, apply to entire roof deck on 2:12 to 4:12 pitch roofs*
- Aggressive self-adhesive—exceeds adhesion requirements to help prevent water migration

- Slip-resistant surface—for excellent traction and safe installation
- Seals tight around nails—modified asphalt construction for a tight seal around nails to help prevent water penetration
- Contractor convenience—UV exposure up to 30 days without edge curling while continuing to provide high-performance lap seal. Split backer sheet for easy application*
- Easy for re-roofing—can be applied over existing single-layer ice and water barriers so re-roofing is easy and less costly

WeatherLock* Flex
Flexible Self-Sealing Ice & Water Barrier

It even beats the leading brand. **Test Methods** WeatherLock* Flex **Leading Brand** It's time to switch to an excellent cold-weather performance and better slip resistance of WeatherLock Flex Flexible Self-Sealing Ice & Water Barrier.
