2305 Mt. Werner Circle
Steamboat Springs, Colorado
SEAD Job #17076
Permit No. B-17-594

Dear Mr. Carr,

Steamboat Engineering & Architectural Design, Inc. (SEAD) has completed a series of special inspections/observations regarding the shoring and repair work specified in the permit drawings dated 10.20.2017. These observations involved inspections of the temporary shoring, removal of deteriorated concrete, zinc coating and concrete formwork throughout the construction process. Further, SEAD has visited the site upon completion to confirm the new concrete was installed and finished per the permit drawings.

All of our observations indicate that the repair was made in accordance with our permit drawings and we find them to be satisfactory.

If you have any questions or concerns with this letter, please do not hesitate to call.

Sincerely,

Steamboat Engineering & Architectural Design, Inc.
Jacob E. Mielke, PE, Project Engineer
Colorado License No. 52418
