Re: Steamboat Basecamp Townhomes – Joist and Beam Penetration Review
1901 & 1950 Curve Plaza
Steamboat Springs, CO, 80487
Anthem Job Number 22-048

Dear Kevin & Asako:

This letter is to confirm that, in March of 2024, Anthem Structural reviewed the penetrations requested in the MEP submittal produced by Boulder Engineering and dated 3/23/23. We confirmed that the penetrations were allowable without impacting structural compliance, and further confirmed that they were installed per our reviewed layout when a representative of our office visited the site on July 22, 2024. The findings of that observation are summarized in the field observation report dated 7/22/24.

We appreciate the specific attention paid to these items, and are available to answer any additional questions that may arise. Please feel free to contact our office if needed.

Sincerely,

ANTHEM
