Construction Site Management Plan Details

Pre Construction Meetings:

Wednesday 9/30/20 @ 7AM & every morning before work is to begin

Dust Control:

All materials removed from the roof will be immediately placed in the site dumpster which will be tarped every evening at the end of the workday. If high winds, causing materials to fly off roof or out of dumpster, occur during the removal of the roofing materials work will be paused and dumpster tarped if necessary.

NA Answers:

- *No ROW permit is needed for this project as all public areas/right of ways will be accessible during the construction process.
- *Erosion & Sedimentation Control: No civil work or any work effecting ponds/drainage/soil etc will be taking place
- *Sanitary Facilities: access to the building facilities will be provided to all crew members
- *Trailers/Field Offices: There will be no field offices present for this project. Any trailers will be parked in the areas marked "Blue Frog Storage/Staging Area"
- *Parking: Crews will utilize the parking lot at Sundance Plaza for all parking needs and no remote parking will be needed. This project also is not located in an area considered downtown or resort base.
- * External Traffic Control: No traffic control will be needed as all job-related activities will not affect the flow of traffic.
- *Emergency Access: Access will be available via regular areas and storage/staging will not affect emergency access to the jobsite nor to the interior of the buildings.
- *All safety, site management plans and notes will be onsite but are not noted on the physical site plan map. Please see attached documentation of site plan details that will be posted.
