#### **Design information:**

Project: Kids Vacation Club Occupancy Classification: E-Occupancy Per Plan: See Plan Review Question Number of Stories: 9 Stories above grade 1 below grade Type of Construction: IB: See Plan Review Question Occupant Load: 583 total Fire Sprinklers: Fully Sprinkled

Dear Owner/Applicant,

The following items below will require additional information or a re-submittal prior to the Permit being Approved and Issued. Please feel free to contact us by phone or email with any questions or concerns.

- **Review Question:** On past projects this building has been a Type 1A Construction, when the building was originally constructed it was a Type IFR under the Uniform Codes, which we have always believed to be a Type IA in the ICC Codes. Please review and let us know if you found this information on some recent plans by chance, or maybe fire sprinkler updates allowed to go to a Type IB, you can research and respond.
- Required Resubmittal Response: The current floor plan is showing a room called "Two's" on the floor plans. The IBC has the below section when you have kids 2 ½ years or younger in age when you want to remain a E-Occupancy. We will need KVC to respond by a letter and signed stating they don't provide care for kids at 2 ½ or younger, or we may need a resubmittal as this room does not have direct exit access to the exterior, and this is not called out as an I-4 Occupancy but rather an E-Occupancy. 308.5.1Classification as Group E.

A child day care facility that provides care for more than five but not more than 100 children 2½ years or less of age, where the rooms in which the children are cared for are located on a *level of exit discharge* serving such rooms and each of these child care rooms has an *exit* door directly to the exterior,

shall be classified as Group E.

Resubmittal took care of items 1 and 2 above. TC 8/2/21

- 3. **Required Deferred Submittal:** RCRBD requests that all deferred submittal per the plans received for Architectural, Structural, Electrical, Mechanical, and Plumbing be submitted throughout the project in advance of work moving being done beyond the required submittal. This allows RCRBD and other **TC** Departments or Agencies time to review and approve these submittals to avoid conflicts or construction of the field. This also includes all Deferred submittal related door hardware and access security cards.
- 4. **Required Special Inspection Reports:** RCRBD requests that all special inspection reports are done per the plans and in accordance with Chapter 17 of the 2018 IBC, and these reports should first be reviewed by the applicable design professional and then uploaded to View Permit under your building permit for review and acceptance by RCRBD. Special Inspection reports should be submitted to RCRBD prior to calling for inspections that may be pending approval of special inspections first.
- 5. **Required Deferred Submittal:** All other Permits and Final Inspection results from other State Agencies and Divisions shall be submitted to RCRBD upon completion for verification prior to us approving a Certificate of Approval on this project.

Dear Todd,

In response to the 06/29/2021 review comments received, we offer the following responses to the written comments of the drawings:

#### **Routt County Regional Building Department Comments:**

 Review Question: On past projects this building has been a Type 1A Construction when the building was originally constructed it was a Type IFR under the Uniform Codes, which we have always believed to be a Type IA in the ICC Codes. Please review and let us know if you found this information on some recent plans by chance, or maybe fire sprinkler updates allowed to go to a Type 1B, you can research and respond.

#### **Gensler Response:**

The existing Sheraton Building, West Tower, is indeed Type IA. This construction type was confirmed by review of the WEST TOWER LEVEL 2 B RENOVATION PROJECT, executed in 2017. The construction Type has been updated on sheet G0.101. REF: G0.101, DRAWING INDEXZ, PROJECT INFORMATION, & GENERAL NOTES.

2) Required Resubmittal Response: The current floor plan is showing a room called "Two's" on the floor plans. The IBC has the below section when you have kids 2 ½ years or younger in age when you want to remain a E-Occupancy. We will need KVC to respond by a letter and signed stating they don't provide

care for kids at 2 ½ or younger, or we may need a resubmittal as this room does not have direct exit access to the exterior, and this is not called out as an I-4 Occupancy but rather an E-Occupancy. 308.5.1Classification as Group E.

Page 2 of 3

#### Gensler

A child day care facility that provides care for more than five but not more than 100 children 2½ years or less of age, where the rooms in which the children are cared for are located on a level of exit discharge serving such rooms and each of these childcare rooms has an exit door directly to the exterior, shall be classified as Group E.

#### **Gensler Response:**

The KVC will indeed provide care for children less than 2 ½ years of age. Rooms K104 – TODDLER, AND K.110 TWOS, are designed for children of this age.

Rooms K-104 and K-110 have been reclassified as I-4 occupancy. As the building is type IA construction the addition of I-4 occupancy does not change the non separated mixed occupancy strategy. No occupancy separation is needed.

The egress requirements for these rooms meets all the requirements for a I-4 rooms. Occupancy Loads and loads on egress elements have been updated accordingly.

The plumbing fixture calculations have been updated to accommodate the new I-4 Classification/ "Adult day care and child day care" per IBC 2018, table 2902.1 as well. Water closets, and lavatories, and drinking fountains have been provided as required. However, the project is not providing the 1 bathtub or shower.

The project ownership Steamboat Ski and Resort Corporation, SSRC, is requesting an exception for the '1 bathtub or shower' requirement. Per IBC section 104.1 Duties and powers of building official, the building official has "the authority to render interpretations of this code."

The Kids Vacation Center, KVC, is not an overnight facility. The kids will be in the center for a short time. The facility operators will use sinks placed within the rooms for any cleaning that is needed. Additionally, The Code of Colorado Regulations, section 7.702.75, do not require a shower for this type of facility.

SSRC and Gensler request approval of not providing the shower.

Dear Todd,

Managing Principal

As a part of our Kids Vacation Club (KVC) remodel within the interior of the Sheraton space at the 2305 Mount Werner Circle, the project ownership, Steamboat Ski and Resort Corporation, SSRC, is requesting an exception for the '1 bathtub or shower' requirement as outlined per table 2902.1 Minimum Number of Required Plumbing Fixtures for a No.5 Institutional Use.

The use of the KVC facility does not include overnight stays and will be limited to daytime hours. Also, the facility operators will use sinks placed within the rooms for any cleaning that is needed. Additionally, The Code of Colorado Regulations, section 7.702.75, for childcare facilities do not require a shower for this type of facility.

SSRC and Gensler request approval of not providing the shower. Per IBC section 104.1 Duties and powers of building official, the building official has "the authority to render interpretations of this code.", we are requesting an exception to not include the 1 bathtub or shower required for an institutional use as outlined per IBC Table 2902.1 referenced above.
