AT&T Gondola Square Equipment Relocation:

Proposed scope:

Relocation of antennas and equipment (removed from Demolished Gondola Square Building Clock Tower) to existing clock tower structure. All radios and support equipment to be located within clock tower structure.

Electrical:

- Installation of new 30A/240V AC circuits from existing AC Panel to Existing AT&T AC-DC Power Plant located in Head End Equipment Room

Structural (Ancillary)

- Installation of (8) new antenna mounts and antennas attached to existing clock tower Roof structure

Non-Permittable:

- Installation of low voltage cabling from head end to clock tower (Conduit pathway)
- Installation of Telecom equipment in head end and clocktower
- Installation of fan (Attic fan) to maintain air circulation in unconditioned space (Clock Tower Attic Space)

Please feel free to reach out with any questions regarding this application. Once AT&T has selected a GC and EC, they will contact the Building Department to be assigned to this project.

Thank you,

Stephen Lester
