Hello City Council Members,

I am writing to express serious reservations and opposition to the proposed development of two hotels and the construction of the Stone Ln. bridge access. Although presented as distinct endeavors, these projects appear to be closely intertwined in terms of funding, timelines, and planning. The lack of transparency surrounding these initiatives raises suspicions, warranting the need for clear and open communication with the affected parties before granting any further approval for their advancement.

Beyond the evident opacity of both undertakings, it appears that the potential negative consequences of either project have not been adequately assessed. While the implications for the town might seem superficial, the repercussions for local residents and the environment could be significantly detrimental. The security and tranquility of established neighborhoods are at risk, and the irreversible impacts on our watershed and wildlife migrations cannot be overlooked.

I implore you to halt the progression of the hotel project until Steamboat residents are provided with comprehensive information regarding the connections between the funding of the bridge project. Furthermore, I urge you to initiate a thorough evaluation of the environmental and residential effects that these projects could entail.

Thanks for your time,  
Bradley Baker
